Iron Hill Brewery & Restaurant Group to open its 20th restaurant in 20 years!

With an aggressive goal of having 20 brewery and restaurant locations open by the year 2020, the Iron Hill Brewery & Restaurant Group is well on its way to achieving and surpassing that target. The year 2018 featured four new locations added to the Iron Hill family. The month of May included grand openings in Greenville, South Carolina, IHB's first expansion outside of the traditional mid-Atlantic region and an additional Delaware spot located in the popular Rehoboth Beach area. Later in the year, new locations were unveiled in Center City Philadelphia and Hershey, PA to engage craft beer and scratch food fans throughout the state of Pennsylvania.

This year, Iron Hill is expanding in the south, opening two new locations in the state of Georgia. New locations in Buckhead and Perimeter are expected to open before year end. In addition to the two new brewery & restaurant locations in Georgia, Iron Hill will be opening its first production brewery in Exton, PA. The new production facility, named Iron Hill Brewery & Taphouse, will allow the group to bring canning operations in house and provide an anchor location for brewing production capacity. This production facility will be the 21<sup>st</sup> location for Iron Hill.

Continued expansion is expected as this chain of brewpubs repeats its successful formula in other markets.

Specific Mechanical Systems, Ltd, based in Victoria, BC, Canada has been the sole supplier of all 21 brewing systems. Each Iron Hill location utilizes a steam heated, 10 Hectolitre "Combi-vessel" style brewhouse on the hot side with 10 hectolitre unitank/fermenters and 10 hectolitre, horizontally stacked, single walled serving tanks on the cold side.
